

# AGILITY BATTERY MOTOR

## Electric Screen Option

**Handheld  
Remote  
Operation**

With all the benefits of an electric screen but the flexibility of wire-free installation, there's an alternative for challenging wired screen installations. The Agility™ battery motor option with the Tensioned Designer Contour® and Designer Contour, available in diagonals up to 110" in 16:9 HDTV format and 113" in 16:10 Wide format, is ideal for no-fuss installations or where flexibility is required to retrofit historic buildings or environments when wiring electricity becomes project prohibitive.

This screen features a lithium-ion battery, lasting over 200 cycles on a single charge via micro USB port, with wireless handheld remote operation and up to 16K-ready screen surfaces. Realize cost savings immediately as it's operational out of the box - requiring no wiring or electrician.

### BATTERY LIFE Lithium-Ion Battery

- Runs over 200 cycles on a single charge
- Conveniently charge with micro USB port

**Power Adapter**

## Accessories

### WiFi Bridge

WiFi Bridge allows for wireless connection to a mobile app where the screen can be controlled up and down as well as battery life indication. Additionally, the accessory allows for control through a third-party device.

### PoE

PoE 5V Micro USB Adapter keeps the battery charged between uses. Connect when needed, or leave connected for maintenance free operation.
